COMSC NOTICE 5200

Subj: MANAGEMENT CONTROL PROGRAM

Ref: (a) SECNAVINST 5200.35D

Encl: (1) OPNAV 5200/7 (3-98) with Instructions
(2) Annual Management Control Plan
(3) Weakness Report Format
(4) Annual Assurance Letter Format

1. Purpose. To provide interim guidance for implementing the Military Sealift Command (MSC) Management Control (MC) Program until a revised OPNAV instruction is promulgated.
2. Applicability. This notice applies to all MSC Assessable Unit Managers, Program Managers (PMs), Functional Directors (FDs), Special Assistants (SAs), Headquarters Field Offices (i.e., NFAF East and West), Afloat Personnel Management Center (APMC), Area Commanders (ACs) and MSC Offices (MSCOs).
3. Management Control Objectives. Management controls are the rules, procedures, techniques and devices employed by managers to ensure that what should occur in their daily operations does occur on a continuing basis. All managers have an inherent responsibility to establish and maintain effective management controls, assess areas of risk as defined in reference (a), identify and correct weaknesses in those controls and keep their superiors informed. An effective MC Program provides reasonable assurance that:
 - a. Controls are implemented and function as intended.
 - b. Management responsibilities and authority are clearly stated and understood.

20 December 2001

c. Military and civilian personnel responsible for systems controls are identified, and the performance appraisals for these individuals reflect the quality of their performance of management control responsibilities.

d. Assets are safeguarded against waste, loss, unauthorized use and misappropriation.

e. Obligations and costs comply with law.

f. Transactions are executed in accordance with law, regulation and policy.

g. Accounts, records and reports are accurate.

4. Background

a. Reference (a) provides SECNAV policy/guidance for the MC Program and significantly changed the program, eliminating the requirement for a 5-year plan, Risk Factor Worksheets and Vulnerability Assessments. Reference (a) also requires all assessable units be reviewed on an annual basis. OPNAV issued interim guidance with a one page OPNAV 5200/7 Management Control Evaluation Form, enclosure (1), that replaces the Risk Factors Worksheets and Vulnerability Assessments.

b. The proper stewardship of Federal resources is a fundamental responsibility of agency managers and staff. Federal employees must ensure that government resources are used efficiently and effectively to achieve intended results. The major thrust of current policy is twofold:

(1) All government agencies are bound by law to maintain an adequate system of management controls; and

(2) The managers of these agencies are tasked to implement, execute and maintain this program.

c. The MC Program encompasses operational and administrative areas as well as accounting and financial management.

5. Action. A revised OPNAV MC Program instruction has not yet been promulgated; therefore, MSC will implement the OPNAV MC Program requirements in FY02 as follows:

a. The Annual Management Control Plan at enclosure (2) was revised based on information in the FY01 Annual Assurance Letters and the October 2001 call letter. Assessable Unit Managers shall review enclosure (2) and ensure it accurately reflects their assessable units. If changes are required, submit them to N00IC with a short explanation describing why the change(s) should be made.

b. Enclosure (1), the Management Control Evaluation Form (OPNAV 5200/7) which was completed for each assessable unit in FY00 and FY01, will be reviewed. If the status of the assessable unit is the same, the Assessable Unit Manager will initial in column three of enclosure (2). New assessable units or revisions to enclosure (2) require that a new Management Control Evaluation Form be completed.

c. As a minimum in FY02, assessable units "X'd" in column four of enclosure (2) will have an Alternative Management Control Review (AMCR) (e.g., DoD IG audit, GAO audit, Naval Audit Service audit, Command Evaluation Review or some inspections) or a Management Control Review (MCR) completed. You may conduct a MCR or AMCR of other assessable units you identify as having weak, nonexistent or excessive controls. Assessable Unit Managers are encouraged to use a documented evaluation that is already in place (an AMCR). Use an MCR only if an alternative evaluation does not exist. The documentation for the AMCRs or the MCRs will be kept at the Assessable Unit Manager level. All documentation must be kept until a new review is accomplished and must be readily available if requested by external auditors or MSC MC Program POCs. Fill in the date of the review in column six of enclosure (2) and indicate if the review has found management control weaknesses in column seven. The format for reporting weaknesses is at enclosure (3).

d. The new or revised enclosure (1), the updated enclosure (2), and applicable enclosures (3) and any other pertinent information will be submitted with the Annual Assurance Letters by 1 August of each year. Enclosure (4) is a sample Annual Assurance Letter.

6. Information Flow. All management control correspondence and weakness reporting will flow as follows:

- a. MSCOs shall report to ACs.
- b. ACs and APMC shall report to N00I.
- c. Headquarters Field Offices (i.e., NFAF East and West) shall report to MSC HQ's reporting Program Manager.
- d. MSC HQ's PMs, FDs and SAs shall report to N00I.

COMSCNOTE 5200

20 December 2001

e. Commander, Military Sealift Command (COMSC) reports to Chief of Naval Operations (CNO).

7. Cancellation Contingency. This notice will remain in effect until incorporated in a COMSC instruction on this subject.
